The Ultimate in Flexibility – Configure and Issue Secure Cheques Using Blank or Pre-printed Cheque Stock

Balancing the need to issue a secure cheque with the new CPA compliance standards is now easier than ever before with the cost-effective yet security-rich Paystation Cheque Payment Software.

This application provides unparalleled flexibility as it is capable of handling pre-printed cheque stock as well as blank cheque stock for personalization and customization, complete with the ability to add up to 16 company logos.

Offering unparalleled flexibility for configuration to accommodate various accounts, companies and cheque issuing requirement, the Paystation CPS maintains its security with multi-level administrative controls and USB HASP key access.

This software application is a key component of the Cash Resource Management Program offered by Paystation and easily added to most Windows®-based accounting and financial packages.

Paystation CPS Options

From Evron

The Ultimate in Flexibility – Configure and Issue Secure Cheques Using Blank or Pre-printed Cheque Stock

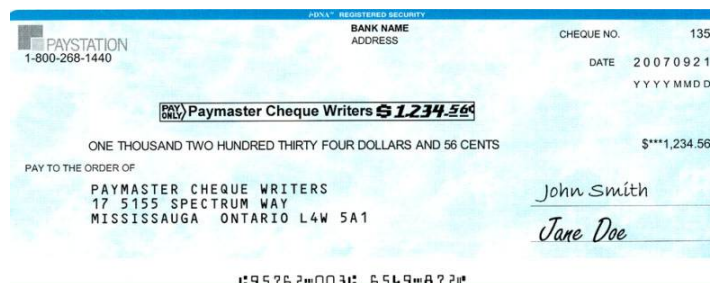

Unparalleled Flexibility:

- Blank Cheque Stock – ability to print cheques using blank cheque stock with a MICR toner cartridge so the cheques are populated with your company, bank and account information only at the time of issuance. This offers the most flexibility, economy, and security, especially if issuing cheques for a varying number of companies and accounts.
- Pre-printed Cheque Stock – economize the use of existing cheque stock with the option of forcing CPA standards.
- Multi-currency and multi-company - up to 100 bank accounts and 100 forms can be accommodated.
- CPA (Canadian Payments Association) New Cheque Standards – whether you are using preprinted or blank cheque stock, your cheques will be compliant. Various data elements can be suppressed or adjusted to accommodate your preprinted cheque stock while maintaining the CPA Compliance requirements.
- Cheque Placement – the flexibility to specify the cheque placement to match your stock – top, middle or bottom placement (preferred cheque placement format for CPA compliance) Security

Additional Security Features

The Paystation CPS is rich with security features for your added peace of mind and assurance:

- Proprietary 3-in-1 image that details the amount plus the Payee in the exclusive Paystation font deter alteration attempts
- Multi-level administrative controls including stringent password parameters, HASP keys and up to 16 encrypted signatures
- Two different password security options – regular and strong with the most robust password parameters for your greatest protection against unauthorized use
- Comprehensive reporting systems using Crystal Reports for both Archive and Audit purposes
