

PermaQuote™

A BusinessVision Add-In Product

By Evron

Create and Reuse Quotations Quickly and Easily

In BusinessVision, once a quote is converted to a sales order, the original quote is lost.

PermaQuote, from Evron Computer Systems Corp., extends BusinessVision's core functionality by maintaining a separate data file which permanently stores quotes which you edit, copy and re-use.

You'll save staff time, improve information accuracy, and send quotes and invoices out to your clients more quickly, thanks to this user-friendly and efficient software solution from Evron.

PermaQuote Features:

- ☑ Seamlessly integrates with BusinessVision through the Order Status field of the Order Details screen.
- ☑ Does not modify any aspect of BV.
- ☑ Supports multi-warehouse order processing
- ☑ Works with multiple company databases.
- ☑ Looks exactly like BusinessVision —same navigation, graphics and functionality.
- ☑ Automatic, in-context pop-up help boxes.
- ☑ Give quotes meaningful names for instant recall.
- ☑ Seamlessly access the BV inventory system for instant lookup by part number, or part description

BENEFITS

- Create quotes in seconds from previously saved quotes
- Minimize data entry errors
- Create standard product packages for quoting
- Respond quickly to repetitive quoting requests
- Seamlessly integrated within BusinessVision
- Built by accounting experts

PermaQuote™

By Evron

Use Resources More Effectively

When BusinessVision converts a quote to a sales order, the original quote is lost. BV users are often frustrated by the requirement to start from scratch each time a quote has to be sent out.

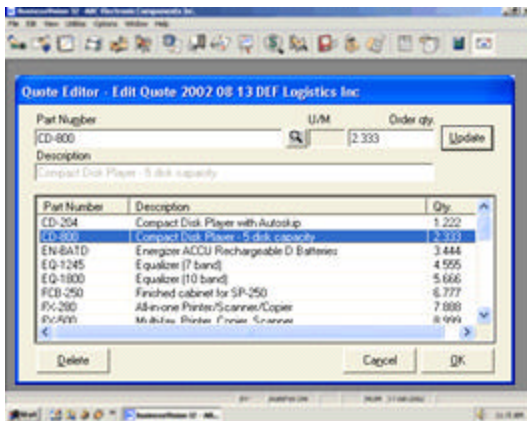

It may take 20 minutes to enter all the line items for a large quote, only to lose the information when a sales order is generated. Why spend valuable time on tedious and unnecessary repetitive data entry? With PermaQuote, this 20 minute job can be done in 20 seconds.

Create Standard Product Packages

If you sell a standard package of products, you can create a standard list once and then instantly pop it into any quote that needs it.

Reduce Data Entry Errors

Data entry always comes with its share of human error, especially during long, repetitive tasks. Even a mistyped dollar value can create problems. PermaQuote reduces the possibility of data entry errors.

Process Orders Across Warehouses

If your company inventory is spread across multiple logical or physical warehouses, PermaQuote will allow you to seamlessly access the part numbers and descriptions for all these warehouses at one time.

Familiar Look and Feel

If you are familiar with the menu structure, navigation structure, graphics, and functionality of BusinessVision, then you intuitively know how to use PermaQuote. Also, explanations of each item pop up instantly when you move your cursor over a button or box. You will have virtually no learning curve, thanks to the intuitive interface and pop-up help boxes.

Seamlessly Integrated within BV

PermaQuote is a true "add-in" product, not an "add-on" product. An add-on product runs externally to BusinessVision, and would require you to run such a program separately each time you wanted to create or edit a quote. PermaQuote runs seamlessly within BusinessVision. It is accessed from the Order Status dropdown box on the Order Details display screen, making quotes instantly available.

Built by Accounting Experts

Since 1983, Evron has designed, implemented, customized and supported accounting solutions for hundreds of customers. We are a BusinessVision Vertical Solution Provider and a Best Software Authorized Reseller.
