By Evron

## History of Success

In a complex and ever-changing industry, Evron clients value the dependability of a proven leader.

Since 1983, we have helped more than 500 customers dramatically improve their customer service, increase sales, and cut the cost of doing business.

## easi.Configurator

Evron is pleased to offer easi.Configurator for organizations where style, colour and size are important variables to identify a specific product.

For example, a tire can be identified by manufacturer, rim size, side wall and width. Shoes, clothing and doors are also examples where this issue arises.

Instead of trying to cope with these variables manually, easi.Configurator allows you to easily manage potentially hundreds of thousands if not millions of possible combinations of products.

## What easi.Configurator Can Do For You

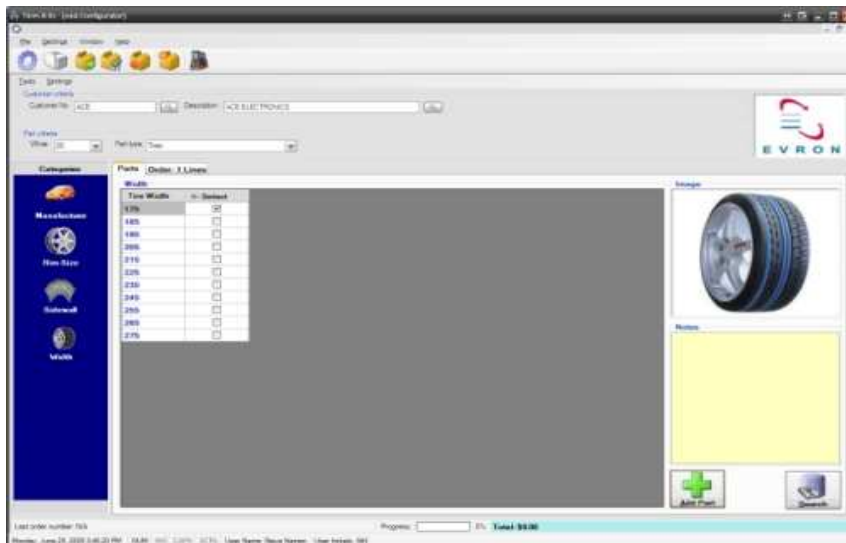

- Provides virtually unlimited categories in which for you to search, select and customize your products;
- Allow for searching and set-up of customizable parts;
- Capable of integration with BusinessVision accounting software.

This kind of software is ideal for manufacturers, especially those involved in industries like apparel, furniture and automotive.

It's software that is easy to use, intuitive and best of all — it's cost effective for your business.

## Call Evron Today
