Platinum Bank Statement

By Evron

Use Resources More Effectively

Why should your valuable accounting people spend hours of their time manually typing in your bank statement? It's a waste of resources, and no fun for them either.

With Platinum Bank Statement all of your account information is imported electronically over a secure line, and you reconcile your Bank with one click of an "OK". It's compatible with all major banks and lets you reconcile any number of accounts and any number of banks.

Eliminate Data Entry Errors

Data entry always comes with its share of mistakes due to human error. This is especially true when the mind tires through long, repetitive tasks.

Evron's Bank Statement's direct import ensures that the information in the bank's system is the same as the information in yours.

Solve Problems Sooner

Thanks to a quicker, more organized bank reconciliation, mistakes will be seen more

Automatically Record Bank Charges

In addition to the usual transactions you have to worry about reconciling all the fees your bank charges. This task has also been handled. Your bank charges are automatically booked according to rules you specify.

Merges with Platinum as One Product

This PFW extension is not a generic bolt-on but an extension to existing functionality, built to the precise standards and protocols of Platinum for Windows software. This seamless integration ensures a smooth flow of information throughout your business.
