Unified Communications

By Evron

History of Success

In a complex and ever-changing industry, Evron clients value the dependability of a proven leader.

Since 1983, we have helped more than 500 customers dramatically improve their customer service, increase sales, and cut the cost of doing business.

Unified Communications Platform

Unified Communications is a unique system that combines voice, data and business functions together into a single, interactive, intelligent and experience.

From this new generation of smart phones, you can take your extension and receive calls wherever you are. Share documents with staff, and have text alerts and real-time messaging. You can easily pick up voice, fax and email messages -- no matter where you are, in the office, at home or on the road.

This also provides the infrastructure for the following additional business benefits:

Wireless & Video Surveillance

Our Unified Wireless Network Solutions make it easy for employees to keep in touch with the business at hand, whether at their desks or on the go. You can also add secure, off-hour, inexpensive video surveillance cameras that transmit over the Internet. They provide a complete security solution in an inexpensive way.

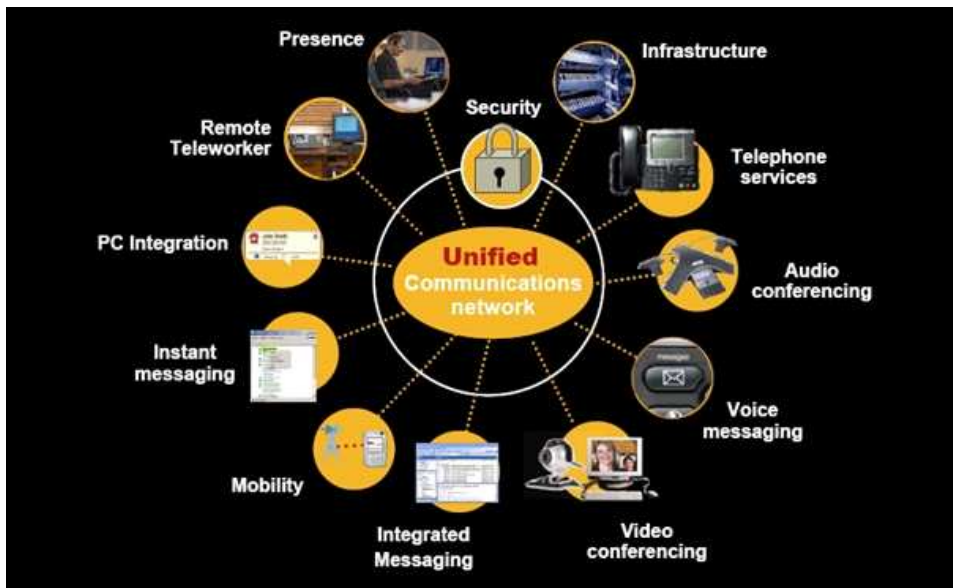

Call Evron Today

With experts in hardware, accounting, CRM and field service, project management, business consulting, training and more, Evron is the long term partner for your technical needs.

If increasing productivity and bottom line savings is important to you, find out more about this great opportunity.
