

Best Supply Chain Management Solution

Recognizes the best solution for coordination and collaboration with suppliers, intermediaries, third-party service providers, and customers in the movement and storage of materials and equipment; work-in-process inventory, and finished goods from point of origin to point of consumption.

Acumatica Cloud ERP – Acumatica

Acumatica is a leading provider of cloud business management software that empowers small and mid-size businesses to unlock their potential and drive growth. Built on the world's best cloud and mobile technology and a unique customer-centric licensing model, Acumatica delivers a suite of fully integrated business management applications such as Financials, Distribution, CRM and Project Accounting, powered by a robust and flexible platform. In an interconnected world, Acumatica enables customers to take full control of their business; to play to their strengths, since every business is unique; and to empower their people by going wherever their people go, on any device.

The licensing model, which does not prohibit widespread company adoption by charging per user (as other ERP companies do) is just one of several key Acumatica differentiators that make us successful. The others are flexible deployment (on-premises, private cloud, public cloud) and True Mobility, with phone apps and camera/fingerprint reader capabilities well-ahead of our competitors. These 3 key differentiators tend to be the reason our customer base is growing so rapidly, and we achieved 134% cloud revenue growth in FY15.
