

What is New in Sage BusinessVision 2018

Company

In **Company > Email settings**, entries were added to control how emailed forms are sent as well as the content of the subject and message body

General Ledger

In **General Ledger > G/L setup**, entries were added to control the appearance of warnings when transactions are backdated into the prior fiscal period, or postdated into the next fiscal period.

Customer Details Enhancements

Form destination options have been expanded to allow the selection of email addresses to be used on a per customer per form basis.

Vendor Details Enhancements

Form destination options have been expanded to allow the selection of email addresses to be used on a per vendor per form basis.

Canadian Sales Tax Enhancements

- In **Customer > Customer tax groups**, entries were added to allow customer groups to be defined. Up to sixty different tax groups can be defined.
- In **Customer Details**, on the **Taxes and shipping** tab, the tax group list was added to allow customers to be assigned to tax groups.
- In **Inventory Details**, on the **Info** tab, items that are subject to sales tax 2 (P.S.T.) can be selectively exempted for customers within one or more customer groups.
- In **Order Details**, when selling an item to a customer who qualifies for a customer group based exemption on sales tax 2 (P.S.T.), the group number is displayed in the sales tax 2 column for exempted items.
- A new invoice form option ("Invoice - Plan Paper - with tax indicators.rpt") has been provided whether sales tax 1 and/or sales tax 2 have been charged on a line item basis.

Report Suite Enhancements

Additional criteria can be specified when printing customer account statements.
