File Size : 27 MB

What's new

The following issues are resolved in Sage BusinessVision 2015 (7.74A)

100309 – Instant Cheques did not print the country in the address.

100310 – The Find utility exported multiple sets of inventory detail records for items with multiple units of measure that matched the search criteria.

100311 – The Point of Sale module did not reset the part number and quantity entry fields when the user has "User Access | Point of Sale | Change unit prices" set to "No" and "User Access | Point of Sale | Default quantity for normal mode" set to "1" after a line item was successfully entered.

100312 – The "Daily Sales Summary by Payment Method" report displayed duplicate lines for payments made in a foreign currency after a currency revaluation was performed.
