

easi.Pack for BusinessVision

By Evron

Easy Shipping with Less Errors

Evron is pleased to offer easi.Pack, a superior, value-added program that assists you in accurately packing and shipping outbound products to your customers.

This software is designed to help shippers select inventory while minimizing the risk of sending incorrect items or quantities. Select your Sage BusinessVision order and pack items using a colour-coded method of tracking the products being shipped.

- ✓ Ship orders from BusinessVision with less errors, in less time, and with ease.
- ✓ Improve accuracy in packing and shipping products to your customers.
- ✓ Supports barcode scanning to minimize risk of packing incorrect items.
- ✓ Uses a colour-coded system to indicate progress and avoid under and over-shipping.
- ✓ Perfect for high traffic environments where goods are transferred in and out of warehouses and manufacturing centres where accuracy and speed are paramount.
- ✓ Provides full documentation and confirmation of product shipment, complete with audit trail and logs.
- ✓ Intuitive interface that is easy to learn.

The screenshot shows the Easi.Pack software interface. At the top, there's a menu bar with 'File', 'Settings', 'Window', and 'Help'. Below that is a toolbar with various icons. The main area is divided into sections for 'Order Number' (0000700512), 'Part Number', 'Order Address' (Bill To and Ship To), and 'Order Details'. A red box in the center says 'Order not complete'. At the bottom, there's a status bar with 'No items scanned', 'Too many items scanned', 'Some items scanned', and 'All items scanned'. The 'Order Details' table is as follows:

REC NO	WHSE	PART NUMBER	DESCRIPTION	QTY	UOM	QTY SCANNED	SERIALS	SCANNED SERIALS	RESET
