

Sage FAS Fixed Assets

FAS Canada Asset Inventory

Efficiently create and track multiple physical inventories of assets and enjoy complete control over your entire asset inventory at every step with FAS Canada Asset Inventory. This solution allows you to track your fixed asset inventory, helping you to eliminate lost or stolen assets and reduce insurance and tax overpayments. With automated inventory functionality and built-in reconciliation capabilities, FAS Canada Asset Inventory offers you a complete range of inventory tracking tools so you can effectively achieve tighter control over your fixed assets.

With an easy-to-use wizard that walks you through every step of reconciling your inventory, FAS Canada Asset Inventory makes automating your fixed asset inventory tracking simple. It allows you to efficiently perform physical inventories using state-of-the-art barcode readers. You can conduct multiple inventories concurrently at various sites and reconcile data at one central location. And, since FAS Canada Asset Inventory comes with over 40 fully customizable fields, you can control data entry with notes and images to describe each asset record. Better still, it integrates seamlessly with FAS Canada Asset Accounting, allowing physical inventory data to be easily reconciled with existing asset data.

From developing innovative products to providing certified customer support, Sage is dedicated to surpassing expectations in all aspects of our business. For more information about FAS Canada Asset Inventory, please call us toll free at 800-945-8007, or visit our Web site at www.SageFAS.com. Sage customer service representatives are standing by to provide you with top-notch products and service.

BENEFITS:

Check-In/Check-Out feature with activity history enables monitoring of mobile assets, and available user fields allow for data entry to be standardized. Photos and documents for each asset can be stored including class, acquisition date, GL asset account, location, and much more, eliminating duplication in asset tracking and facilitating clean audits.

With the wealth of features offered including configurable data fields, and a asset templates that promote data integrity and accelerate the process of entering new assets, you can customize your Sage FAS Fixed Assets solution to work the way you want to.

Asset labels and barcode readers complete the inventory solution: Optional components, durable, preprinted barcode labels made of polyester, foil, or aluminum, and barcode readers make tracking assets quick, easy, and accurate.

Security profiles can be defined differently for each individual user who has access to the system, ensuring that only those individuals allowed to change the data are able to.

Sage FAS SupportPlus members benefit from an unmatched level of customer support—visit our online knowledgebase or call the Sage FAS Customer Support Team, and our friendly, knowledgeable experts are ready to help. FAS SupportPlus members can also receive software updates, access multimedia tutorials, and take advantage of exclusive discounts on new products.

FAS Canada Asset Inventory combines solid fixed asset inventory capabilities with an easy-to-use interface and readily integrates with the complete line of Sage FAS solutions

Powerful Reports

The FAS Canada Asset Inventory family provides the necessary reports for you to track your assets and obtain crucial information about individual assets or groups of assets. You can quickly and accurately report on:

- Fixed asset listing
- Asset detail
- Collected data from barcode readers
- Checked out assets
- Overdue assets
- Transferred assets
- Inventory exceptions found
- Fixed asset history
- Duplicate asset tag notification

FAS Asset Inventory is designed to meet the number of assets of your organization:

FAS Canada 100 Asset Inventory

- Stand-alone or multiple network user seats
- Designed for entities with fewer assets

FAS Canada 500 Asset Inventory

- Faster processing times with Microsoft SQL Server infrastructures
- Designed with client/server architecture and support for multiple databases
- Easily accounts for hundreds of thousands of fixed assets
