Spire – ShipStation Integration

Evron Computer Systems Corp.

Evron's ShipStation integration offers Spire users the opportunity to streamline their shipment process with the rest of their system.

Spire + ShipStation®

Easy Setup

- Connect directly to major couriers (including Canada Post, Canpar, DHL, FedEx, Purolator, and UPS)
- Access from a web browser and various devices
- Remotely set up integration within a few hours

Faster Processing

- Send all relevant information, order item details, weight, and customer address, and email directly from Spire to Shipstation
- Track shipments and manage orders all in one place
- Reduce errors by automatically updating courier, tracking number, and shipment date in Spire from ShipStation

Connect With Customers

- Place your brand on emails, packing slips, shipping labels, tracking pages, and returns portals
- Send customers an automated notification emails

Save Money

- Compare services using ShipStation's shipping calculator
- Book a free demo and receive a free 30-day trial of ShipStation

Integration Workflow

Evron's Spire to ShipStation integration uses the Phase feature in Spire which consists of three user-defined distinct stages and user selectable time intervals.

Phase 1: Order is Ready to Ship

The first phase starts the process. It could be selected by the user or it could be a next phase in the workflow. It generally indicates that the order is picked and is ready to be shipped.

Phase 2: Order is Pending At ShipStation

The integration scans for sales orders in Phase 1, and sends these orders to ShipStation, advancing the Phase 2.

Phase 3: Order is Processed in ShipStation

After the user processes the sales order in ShipStation (e.g., prints the shipping label, generates tracking number, etc.), our integration then updates the "Info" tab in Spire with the courier same, date, and tracking number. This advances the order to Phase 3. Users also have the option of notifying customers through branded, automated email with links to a customized tracking page.
