

Evron Advance Field Service for Acumatica

Fully Unified End-to-End Field Service & Construction Software

What is Evron Advance Field Service for Acumatica (EAF)?

Our software is a comprehensive solution designed specifically for landscaping and construction companies looking to streamline operations and increase efficiency. Our software, natively built within Acumatica ERP, allows you to easily track your financials, manage contracts and quotes, and oversee your crew's activities within a single, unified ERP system.

How can you benefit by implementing EAF?

Improved efficiency: By streamlining operations and having all your business information in one place, you can reduce the time and effort required to manage your business.

Increased profitability: With accurate job costing and financial tracking, you can make more informed business decisions that help maximize profitability.

Enhanced communication: Our software includes collaboration tools that allow you to communicate easily with your team and stay up-to-date on the status of projects.

Reduced errors: By automating processes and eliminating manual data entry, you can reduce the risk of errors and improve accuracy.

Evron Advance Field Service for Acumatica

Fully Unified End-to-End Field Service & Construction Software

Key Features of Evron Advance Field Service for Acumatica (EAF):

- **Service Contract Quoting:** Our solution allows you to accurately define the prices and costs of each service contract quote, including materials, labour, and other expenses. This ensures that you stay within budget and maximize profitability.
- **Property Takeoffs:** This will allow you to define an unlimited number of property measurements per location and accurately calculate the materials, labour and other expenses needed for a service contract, helping to streamline the bidding and estimation process.
- **Financial tracking:** Since our solution is embedded as part of the Acumatica ERP platform, it benefits from Acumatica's robust financial tracking capabilities, allowing you to keep an eye on your bottom line and make informed business decisions.
- **Clock In – Clock Out:** You can keep track of the time the technicians and other employees start and finish the working day. Comparing it to work performed gives you accurate reports on employee performance and future payroll payments.
- **Equipment Tracking:** Allows the identification of associated costs and usage of vehicles and any other equipment used during the service activities like fuel consumption, repairs, equipment usage, lease, insurance, depreciation, and other expenses.
- **Advance Billing:** On top of the pre-existing Acumatica service contract billing types, our solution introduces the new Advance Billing options, which allow you to define any number of billing periods with different amounts as needed, regardless of the duration of the contracts.
- **Mobile accessibility:** Our software is user-friendly and can be accessed from any device, making it easy to manage your business from anywhere. This is particularly useful for landscaping and construction companies that often work on-site and need to access important information on the go.
